

Our purpose at Sol-Tec is to “Enable public sector customers to discover new capabilities and cost efficiencies through data centre migration to the public cloud” We do this by helping public sector customers adopt and harness the power of cloud computing. We believe that the growth of a great business can only be fuelled by great people, so join us in our partnership with Microsoft and help us build one of the most disruptive companies in the cloud industry.

What you’ll be doing?

As a consultant within our Cloud and Infrastructure team you will use your in-depth knowledge of implementing cloud based solutions with Microsoft Azure. You will get to work on complex and challenging transformation projects for a multitude of public sector clients. You will innovate and implement solutions which drive tangible business value, taking accountability for successful project outcomes.

What we are looking for?

- Expert knowledge of Azure, specifically IaaS, PaaS and their related services such as OMS / ASR / Azure Backup / ExpressRoute etc
- Experience of building and recommending a migration approach to lift and shift workloads to Azure and/or architecting a green-field development and/or production platform for new applications
- Extensive working knowledge of Microsoft’s Technology stack and services at a technical delivery level
- Comfortable working in Agile environments utilising DevOps tools and familiar with VSTS
- Experience consulting skills across traditional core Microsoft on-premises technology, including most of the following:
  - Active Directory, DNS, DHCP, Certificate Services and other core workloads
  - AD FS
  - SQL (including Always On Clustering)
  - SCCM
  - Remote Desktop Services
  - Hyper-v
- Additional experience across AWS, Linux, Office365, EMS and CRM Online is an advantage.
- Comfortable presenting Microsoft Cloud-focused solutions and recommendations to executive level
- Forward thinking with an inquisitive mind and a desire to innovate and work with clients on complicated projects
- Extensive experience in working in a large corporate & public sector environments.
- Passionate about technology, especially Microsoft cloud and related technology
- Efficiently communicate both verbally and in written form
- Mature and professional outlook results driven, high energy and resilience are important characteristics.

In return you’ll be rewarded with an attractive package, a dynamic working environment and the opportunity to extend your skills and career.
